

## The Galactic Star 3CE – additions to manual

The Galactic Star is similar to other CE range units, except that it has a shutter on channel 1. This means **you will not get any light out of the unit** until you move Channel 1 away from zero.

### Setting up controllers to use the Galactic Star

On the Abstract controllers, if a Galactic Star setting is not available, you should configure the unit as a Futurescan 3. The Shutter will operate from joystick pan, the Beam rotation from joystick tilt, the colour and gobo as usual.

So to take the unit out of blackout, move the joystick to the centre, then select a gobo using the gobo controls.

### Blackout and Strobe effects

You can black out and strobe the unit using the gobo controls as usual, you can also black out and strobe using the Shutter channel. This allows you to strobe a gobo and black out instantly on a gobo. The Galactic Star features a superfast strobe mechanism.

### Fade to black effect

If you fade the gobo channel to zero, the Galactic Star will “fade” to blackout.

### Supersound™

The Galactic Star features the new Abstract Supersound system. This guarantees a superior light show in stand alone mode. If you have other Abstract effects, put the Galactic Star first in the DMX chain to ensure the other units receive the Supersound information.

## DMX implementation

### Shutter (Ch 1 on Galactic Star)

DMX	Result
0	Blackout
4-220	Open
224	Slowest strobe speed

254	Fastest strobe speed (8 speeds)
-----	---------------------------------

### Rotation (Ch 2 on Galactic Star)

DMX	Result
0	Stop
12	Fastest speed clockwise
112	Slowest speed clockwise
128	Stop
141	Slowest speed a.clockwise
244	Fastest speed a.clockwise
255	Stop

### Colour (Ch 3 on Galactic Star) Gobo (Ch 4 on Galactic Star)

DMX	Galactic Star
10	White
26	Red
43	Blue
59	Green
75	Yellow
91	Cyan
108	Orange
124	Magenta
140	Neon Green
156	Pink
173	UV Blue
189	Multicolour
205	Multicolour
221	UV blue
238	Pink
254	Neon Green

DMX	Galactic Star
0	Blackout
24	Open
40	Laser
56	Star
72	Slice
88	Tunnel
104	Heart
120	Eurostars
136	Sunburst
152	Triangle
168	Slash
184	Bubbles
200	Segment
216	Bubbles
226	Slow strobe
254	Fast strobe (8 spds)

NB: Intermediate values will give mixed colours or gobos
